Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Cell wall.
SIMILARITY: TO OTHER STREPTOCOCCAL AND STAPHYLOCOCCAL PROTEINS
IN THE REGION OF THE MEMBRANE ANCHOR.
SIMILARITY: BELONGS TO FAMILY 66 OF GLYCOSYL HYDROLASES.
CAUTION: IT IS UNCERTAIN WHETHER MET-1 OR MET-5 IS THE INITIATOR.

-!- FUNCTION: FLAGELLIN IS THE SUBUNIT PROTEIN WHICH POLYMERIZES TO FORM THE FILAMENTS OF BACTERIAL FLAGELLA.

-!- MISCELLANEOUS: INDIVIDUAL SALMONELLA SEROTYPES USUALLY ALTERNATE BETWEEN THE PRODUCTION OF 2 ANTIGENIC FORMS OF FLAGELA, TERMED PHASE-1 AND PHASE-2, EACH SPECIFIED BY SEPARATE STRUCTURAL GENES.
-!- SIMILARITY: BELONGS TO THE BACTERIAL FLAGELLIN FAMILY. "Complete genome sequence of Salmonella enterica serovar Typhimurium 170 LIYADGKTQTAEFKGTFEEATAEAY-RYA------DLLAKENGKYTVDVAD-KGYT 249 VRDADNNTLSEVNKAIAVESDWTKFPRYGIVGGSQDTNNSLLSKDADRYRAEIEKMKNMN LNIKF---AGKEKTPEEPKEEVTIKANLIYADGK---TQTA-EFKGTFAEATAEAYRYAD Bacteria; Proteobacteria; gamma subdivision; Enterobacteriaceae; MEDIINE-82049491; PubMed-6271461; Silverman M., Zieg J., Mandel G., Simon M.; "Analysis of the functional components of the phase variation ō Vanegas R.A., Joys T.M.; Mulecular analyses of the phase-2 antigen complex 1,2,. . .                                                                                                                                                                                                                                                                                                                 HEAVY CHAIN SUBDUTING (MIG), 2 ALKALI LIGHT CHAIN SUBDUTING (MLC)

AND 2 REGULATORY LIGHT CHAIN SUBDUTING (MLC-2).

-1 SUBCELLULAR LOCATION: Thick filaments of the myofibrils.

-1 DOMAIN: THE RODLIKE TAIL SEQUENCE IS HIGHLY REPETITIVE, SHOWING CYCLES OF A 28-RESIDUE REPEAT PATTERN COMPOSED OF 4 HEPTAPEPTIDES, CHARACTERISTIC FOR ALPHA-HELICAL COLLED COILS.

-1 PTM: TWO CYSTEINE RESIDUES IN THE SI DOMAIN ARE SELECTIVELY ALKYLATED AND ARE REQUIRED FOR MYOSIN ATPASE ACTIVITY.

-1 MASCELLANGOUS: EACH MYOSIN HEAVY CHAIN CAN BE SPLIT INTO 1 LIGHT MEROMYOSIN (LMM) AND 1 HEAVY MEROMYOSIN (HMM). IT CAN LATER BE SPLIT EVERHER INTO 2 GLOBULAR SUBFRAGMENTS (SI) AND 1 ROD-SHAPED
SEQUENCE OF 1502-1940 FROM N.A.

                              DOMAIN: Has a highly basic region with many copies of the sequence KKEE and KKEI/V, repeated but not at fixed intervals, which is responsible for the binding of MAPIB to microtubules. PTM: LC1 IS COEXPRESSED WITH MAPIB. IT IS A POLYPEPTIDE GENERATED FROW MAPIB BY PROTEOLYTIC PROCESSING. IT IS FREE TO ASSOCIATE WITH BOTH MAPIB AND MAPIB. IT INTERACTS WITH THE AMINO-TERMINAL REGION
        SUBUNIT: 3 DIFFERENT LIGHT CHAINS, LC1, LC2 AND LC3, CAN ASSOCIATE WITH MAPIA AND MAPIB PROTEINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ------LNIKFAGKEKTPEEPKEEVTIKANLIY 100

FUNCTION: ICE NUCLEATION PROTEINS ENABLE BACTERIA TO NUCLEATE
                                                  CRYSTALIZATION IN SUPERCOLED WATER.

-! SUBCELLIZATION IN SUPERCOLED WATER.

-! SUBCELLIZATION OUTER membrane.

-! SUBCELLIZATION OUTER membrane.

-! CONSENSUS

OCTAREPTIDE A-G-Y-G-S-T-L-T; FURTHER ON A 16-RESIDUE AND A REGIONAL 48-RESIDUE PERIODICITY IS SUPERIMPOSED.

-! SUBCELLAROSUS: A STRUCTURAL MODEL IS SUGGESTED IN WHICH THE J NUCLEATION PROFIEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE.

-! SIMILARITY: BELONGS TO THE BACTERIAL ICE NUCLEATION PROTEIN
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Length 1200;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Indels

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
